CASE STUDY · MARCH 2026 · v2.0

STOP GUESSING. START EARNING.

How One Logistics Group Created $2.0M in Net New Revenue

In 2025, a multi-company transportation group stopped leaking revenue and started capturing it. By deploying a unified AI-powered command center across three business units, leadership turned five hidden revenue leaks into five working profit engines — without adding headcount.

BCAT Logistics

FREIGHT BROKERAGE

2025 Operating Year

Ivan Cartage

AMAZON DSP

2025 Operating Year

Best Care Auto

VEHICLE TRANSPORT

2025 Operating Year

THE RESULT

$2.0M+ in net new revenue · $310K margin recovery · 160 bps gross margin lift · $3.78M active pipeline.

A business that finally runs on data instead of instinct.

FIVE REVENUE LEVERS, ONE PLATFORM

What Happens When a Logistics Group Stops Leaking Revenue

Most transportation businesses don't lose to competitors. They lose to slow quotes, invisible per-truck economics, software bloat, untouched client books, and missed delivery windows. The platform turned five revenue leaks into five working profit engines — without adding headcount.

Enterprise Performance Center — Group View

FY 2025 · ALL COMPANIES · LIVE

GROUP REVENUE	NET NEW REVENUE	MARGIN RECOVERY	ACTIVE PIPELINE	GROUP OTD	AGENTS LIVE
$12.51M ↑	$2.02M ↑	$310K	$3.78M	96.2% ↑	6/6 ↑

BCAT Logistics — FREIGHT BROKERAGE

Revenue $9.7M · 16.8% gross margin

Margin lift	+160 bps
Win rate	26.4%
Pipeline	$2.84M
Marketing ROAS	4.2x

Ivan Cartage — AMAZON DSP

Revenue $2.8M · 7.5% true profit

Margin lift	+230 bps
Active trucks	28
Detention recovered	$22K/yr
Marketing ROAS	3.1x

Best Care Auto — VEHICLE TRANSPORT

Growing segment · Q4 launched

CPL improvement	$94 → $65
Pipeline	$940K
Marketing ROAS	3.9x
Lead-to-close	14 days

THE CHALLENGE

Quoting was slow and reactive — losing winnable loads. Per-truck profitability invisible. Software costs creeping. Outreach manual and existing clients under-mined. OTD wasn't measured in a way that earned shipper trust.

THE SOLUTION

A single command center connecting Finance, Marketing, and Sales across all three companies — backed by six autonomous agents that quote loads in seconds, score every truck and lane daily, and run outreach + nurture continuously.

The Measured Outcomes (12 Months)

Net New Revenue Created	$2,015,000
Margin Recovery (12 mo)	$310,000
BCAT Gross Margin Improvement	15.2% → 16.8%
Ivan Cartage True Profit Margin	5.2% → 7.5%
Marketing Blended ROAS (BCAT)	3.1x

Wasted Ad Spend Reclaimed	$11,800/yr
Monthly Meetings Booked (Group)	28
Email Reply Rate vs. Benchmark	8.4% vs. 3–5%
Combined Active Sales Pipeline	$3,780,000
Total Revenue Across Group	$12,511,000

> “ *Visibility isn't a reporting benefit — it's a revenue lever. Every dollar of new revenue in this study traces back to a decision that was only possible because the data existed in real time.*

RYNE BANDOLIK · ryne@bcatcorp.com · 224-715-1381

THE FIVE REVENUE LEAKS

Where Every Growing Transportation Company Is Losing Money Right Now

Growth creates complexity. Complexity creates blind spots. Blind spots leak revenue.

LEAK #1 · QUOTING SPEED

Slow Quotes Lose Winnable Loads

Sub-5-minute quotes win at roughly 1.5–2x the rate of 30+ minute quotes. Without a spot-quote engine pulling lane history and live market rates, brokers respond too slowly — and shippers go with whoever answered first.

Estimated leak: $1.0M – $1.5M/yr in unwon loads

LEAK #2 · HIDDEN PER-TRUCK ECONOMICS

Per-Truck P&L Is a Mystery

On a 25-40 truck DSP fleet, the bottom 15-20% of routes typically run at break-even or worse once fuel, maintenance, driver pay, insurance, and tolls are loaded in. Without daily visibility, you can't fix what you can't see.

Estimated leak: 150–250 bps of net margin

LEAK #3 · TOOL & HEADCOUNT BLOAT

You're Paying for 12 Tools to Do the Work of 4

Mid-sized logistics groups typically run 8–14 disconnected SaaS tools. Each one needs a person to babysit it. The costs aren't just the licenses — they're the back-office hires you make to glue them together.

Estimated leak: $80K–$150K/yr in software + avoided hires

LEAK #4 · UNTOUCHED OUTREACH & BOOK

Cold Outreach Is Manual. Existing Clients Are Underserved.

Most brokers capture only 15–30% wallet share with their existing clients. The bigger leak isn't bad outbound — it's the lanes your current customers are giving to your competitors because nobody's asking for them.

Estimated leak: $400K–$700K/yr in expansion revenue left on table

LEAK #5 · UNMEASURED OTD = NO RATE POWER

If You Can't Prove On-Time Delivery, You Can't Charge a Premium for It

OTD is the gateway metric for every dedicated lane, every core carrier program, every rate increase. Without precise tracking and shipper-facing reports, you're stuck in spot-market commodity pricing — and absorbing avoidable claims and chargebacks.

Estimated leak: $150K–$300K/yr in foregone rate premium + claims

THE COST OF STAYING BLIND

$2.0M+ in recoverable revenue

— not from squeezing the business, but from finally being able to see and capture what's already there.

RYNE BANDOLIK · ryne@bcatcorp.com · 224-715-1381

THE ARCHITECTURE

One Platform. Every Company.
Every Department. Real Time.

The Command Center connects financial data, quoting, marketing performance, sales activity, and load tracking across every business unit into a single dashboard.

BCAT Logistics	Ivan Cartage	Best Care Auto
Global Metrics Bar — Enterprise Summary (visible on every page)		
Spot Quote Engine	Per-Truck P&L	OTD & Track / Trace
Finance Intelligence	Marketing Intelligence	Sales Intelligence
Outreach Automation	Client Nurture Engine	Carrier Scorecarding

REVENUE

Quote, Win, Bill

Sub-5-min spot quotes from lane history + market data. Automated billing, detention & accessorial capture.

MARGIN

Per-Load & Per-Truck

Real-time margin per load, per lane, per truck, per driver. Anomaly detection on rate compression.

GROWTH

Outreach + Nurture

Email + LinkedIn sequencing for new biz. Lane-gap analysis and dormant account triggers for existing book.

The Agent Layer (Autonomous, 24/7)

Six autonomous agents run continuously behind the platform — quoting, scoring, sequencing, and reporting:

QuoteAgent · FinanceAgent · MarketingAgent · SalesAgent · TrackTraceAgent · CoordinatorAgent

RYNE BANDOLIK · ryne@bcatcorp.com · 224-715-1381

LEVER 1 · THE SPOT QUOTE ENGINE

Win the Loads You're Already Quoting

The single biggest predictor of win rate in freight brokerage isn't price — it's response time. The Spot Quote Engine pulls lane history, live market rates, and carrier capacity to deliver a defensible quote in under 90 seconds.

$1.2M

Net new annual revenue from won loads that were previously lost

Same quote volume. Same sales team. Higher win rate because the quote arrives first and is priced right.

BCAT Logistics — Spot Quote Engine

LIVE · Q4 2025

QUOTES TODAY	WIN RATE	AVG RESPONSE	WON TODAY	PIPELINE	MARGIN FLOOR
47	26.4% ↑	3.2m ↓	12 ↑	$87K ↑	16.8%

Win Rate Trend — 12 Months

Engine activated April 2025 · 20.1% → 26.4%

Response Time

Last 30 days · 1,420 quotes

<2 min	28%
2-5 min	45%
5-15 min	18%
15-30 min	6%
30+ min	3%

The Math, Step by Step

50 quotes/day · Baseline win rate **20%** = 10 won loads/day

Post-platform win rate **26%** = 13 won loads/day **+3 LOADS/DAY**

3 incremental loads × 250 working days × **$1,750 avg revenue** = **$1.31M new revenue**

At 16.8% gross margin = ~$220K new gross profit, year one.

WHY IT WORKS

- → Pulls 12 months of lane history per shipper-origin-destination triple
- → Cross-references DAT/Greenscreens market data in real time
- → Quote out the door in under 5 minutes — often under 90 seconds
- → Auto-sets target margin floor; flags anything below it

CONSERVATIVE SCENARIO

Even if win rate only lifts from 20% → 23% (half the projected gain), the math still produces:

$655K

in new annual revenue / ~$110K new gross profit. The platform pays for itself either way.

LEVER 2 · DAILY PER-TRUCK PROFITABILITY

Know Which Trucks Make Money.
Every Single Day.

In a DSP fleet, 80% of margin damage comes from the bottom 15-20% of trucks: bad routes, fuel theft, undocumented detention, maintenance creep. Daily P&L per asset turns those leaks into action items.

+230 bps

Ivan Cartage true profit margin: 5.2% → 7.5%

$84K in margin recovered annually on $2.8M revenue — without cutting a single truck or driver.

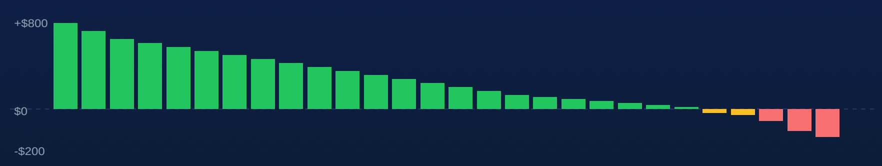
Ivan Cartage — Daily Per-Truck P&L

LIVE · TODAY 12 DEC 2025

ACTIVE TRUCKS	FLEET MARGIN	TOP TRUCK	WATCH LIST	DETENTION RECOVERED
28	7.5% ↑	+$812	3	$1.4K ↑

Today's Margin by Truck (28 units, ranked)

Green = above floor · Amber = at floor · Red = below floor



Today's Anomalies

Auto-flagged · Action required

Truck #14	Fuel +18%
Truck #07	Detention OPEN
Truck #22	Maint due
Lane CHI→IND	Margin -4pt

WHAT THE DASHBOARD SHOWS DAILY

Revenue per truck	$385–$680/day
Fully-loaded cost per truck	tracked live
Margin per truck	color-coded
Fuel variance vs. lane baseline	flagged
Detention & accessorial recovery	automated

WHERE THE $84K COMES FROM

Cut/reroute bottom 4 underperforming routes	$38K
Recovered detention & accessorials	$22K
Fuel variance investigation	$11K
Maintenance flagged early (avoided breakdowns)	$13K
Total margin recovery	**$84K**

THE COMPOUNDING EFFECT

As Ivan grows from 28 trucks toward 50, daily P&L visibility scales linearly. At 50 trucks the same lever is worth ~$150K/yr in margin recovery — and prevents the most common cause of DSP failure: hidden cost creep across an expanding fleet.

> “ *You can't fix what you can't see at the asset level. Monthly financials show you the answer four weeks too late. Daily per-truck P&L shows it tomorrow morning.*

LEVER 3 · TOOL CONSOLIDATION & HEADCOUNT LEVERAGE

Pay for Fewer Tools.
Hire Fewer Admins. Grow Faster.

Logistics groups don't fail from too few tools — they fail from too many disconnected ones. The Command Center replaces five overlapping subscriptions and absorbs the back-office work that used to require an additional admin hire.

$107K

Annual cost avoided in software + back-office headcount

Not layoffs — this is the admin hire you didn't have to make as you grew 50%+ in load volume.

BEFORE — TOOL STACK BLOAT

BI / Reporting tool	$8,400/yr
Standalone CRM	$11,200/yr
Email outreach platform	$7,800/yr
Marketing analytics	$6,900/yr
Manual data-prep contractor	$8,000/yr
Subtotal — software replaced	**$42,300/yr**

AFTER — ABSORBED & AVOIDED

Software stack consolidated into platform	$42K
Avoided 1 back-office admin hire (loaded)	$65K
Total cost avoidance	**$107K/yr**

No driver, dispatcher, or sales role was eliminated. This is operating leverage, not cost cutting.

Where the Hours Used to Go

Manual Task	Hours/Week Reclaimed
CSV exports & reconciliation across 5 tools	8–10 hrs
Lead scoring & outreach list building	10–12 hrs
Ad performance review & campaign edits	6–8 hrs
Weekly executive reports	4–6 hrs
File processing & load doc handling	3–4 hrs
Total automated capacity returned	**33–43 hrs/week**

> *$107K is the conservative direct number. The bigger value is what those 33-43 hours got redirected toward — outreach, client nurture, sharper carrier negotiation. That re-deployed capacity shows up in every other lever in this document.*

LEVER 4 · AUTOMATED OUTREACH + CLIENT NURTURE

Win New Customers.
Squeeze Every Dollar From Existing Ones.

Two distinct revenue engines, not one. Cold outreach gets new logos. Client nurture grows wallet share with the customers you already have — which is where most of the money actually is.

$705K

Combined annual revenue: new logos + existing client expansion

Most brokers focus 90% of effort on new business and leave existing-account expansion entirely to chance. This flips the math.

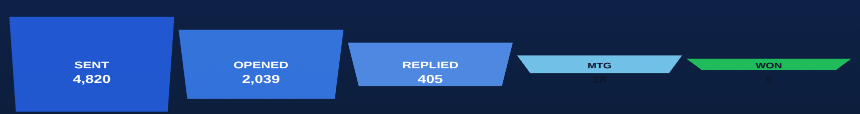
BCAT Group — Sales Intelligence

LAST 30 DAYS · ALL CHANNELS

EMAILS SENT	OPEN RATE	REPLY RATE	MEETINGS	PIPELINE	HIGH-INTENT
4,820	42.3% ↑	8.4% ↑	28 ↑	$3.78M	47

Outreach Funnel — Last 30 Days

Sent → Opened → Replied → Meeting → Opportunity → Won



High-Intent Accounts

Multi-open + RFQ signals

Midwest Mfg Co.	9 opens
CHI Logistics LLC	RFQ + reply
Great Lakes Foods	7 opens
Apex Distribution	5 opens

PART A — COLD OUTREACH (NEW LOGOS)

Open rate	42.3% (vs 21–28%)
Reply rate	8.4% (vs 3–5%)
Meeting-to-opportunity	35%
Opportunity close rate	20%
Avg first-year customer value	$90K
New annual revenue from outreach	$220K

PART B — CLIENT NURTURE (THE BIG ONE)

Existing book of business	$9.7M
Estimated wallet share before	~22%
Wallet share after nurture	~27% (+5pp)
Lane-gap analysis triggers	automated
Dormant account reactivation	automated
Expansion revenue from existing book	$485K

WHY THIS WORKS

Four mechanics drive both engines: **segmentation** (different copy by persona), **intent signals** (multi-open detection on prospects, RFQ-without-award on existing clients), **lane-gap analysis** (cross-references shipper origin/destination patterns vs. lanes you currently win), and **multi-channel coordination** (email + LinkedIn synced).

RYNE BANDOLIK · ryne@bcatcorp.com · 224-715-1381

LEVER 5 · TRACK & TRACE → OTD → RATE POWER

Better OTD Doesn't Just Save Money. It Earns You the Right to Charge More.

On-time delivery is the single most-watched KPI by every shipper. The platform automates check-calls, pushes shipper-facing reports, and turns OTD from a cost center into a competitive weapon you can monetize.

$312K

Combined annual impact: rate premiums + claims reduction + core carrier wins

OTD lifted from 91.4% to 96.2% — and shippers paid for it.

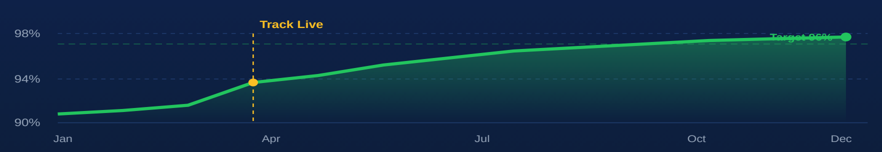
BCAT Logistics — OTD Performance Center

LIVE · ALL ACTIVE LOADS

OTD RATE	IN TRANSIT	EXCEPTIONS	LATE RISK	CLAIMS OPEN	AVG DWELL
96.2% ↑	89	3	2	0	47m ↓

OTD Trend — 12 Months

Track & trace activated Q2 · 91.4% → 96.2%



Top Lanes by OTD

90-day rolling · Dedicated only

CHI → DAL	98.7%
IND → ATL	97.4%
DET → CHI	96.9%
MEM → HOU	95.2%
STL → KC	92.8%

How OTD Becomes Revenue

A · RATE PREMIUMS

$87K/yr

3% rate increase negotiated on dedicated lanes after 96%+ OTD documented over 90 days. Applied to ~$2.9M dedicated business.

B · REDUCED CLAIMS

$45K/yr

Earlier exception detection means fewer late deliveries become disputes. Documented OTD also wins the disputes that do occur.

C · CORE CARRIER WIN

$180K/yr

96%+ OTD qualified BCAT for one new core-carrier slot — converting a spot relationship into a contracted, predictable lane.

THE BUSINESS UNLOCK

Once you can prove 96%+ OTD with shipper-readable reports, you're no longer a spot-market vendor. You're a strategic carrier — and that's the conversation that wins dedicated lanes, premium pricing, and core carrier slots that compound over years. The platform automates check-calls every 4 hours, auto-flags exceptions before the late delivery happens, and pushes shipper-facing OTD reports weekly.

> " *OTD is the gateway. Every long-term piece of brokerage revenue — dedicated lanes, RFP wins, premium pricing — sits on the other side of being able to prove it consistently.*

RYNE BANDOLIK · ryne@bcatcorp.com · 224-715-1381

BONUS LEVERS · QUICK-WIN REVENUE MECHANICS

Seven More Revenue & Margin Mechanics Built Into the Same Platform

Beyond the five primary levers, the Command Center surfaces another seven mechanics that most logistics groups never systematically capture. Individually small. Collectively transformational.

1 · Detention & Accessorial Recovery — $60-120K/yr

Most brokers leave 30–50% of legitimate detention, lumper, and TONU charges uncollected. Automated capture from EDI/check-call data turns these into billed revenue.

2 · Carrier Scorecarding — 50-120 bps margin

Performance + rate history per carrier per lane. Pushes back on rate creep, consolidates volume to top performers, and weeds out problem carriers before they hurt OTD.

3 · Backhaul / Deadhead Reduction — $30-60K/yr

For Ivan Cartage especially. Cutting deadhead from 13% to 9% directly hits net margin. Smart matching flags backhaul opportunities before the truck dispatches empty.

4 · Customer Credit Monitoring — $25-50K avoided

One bad debt write-off can wipe out months of profit. Real-time DSO alerts and customer concentration warnings are pure defensive revenue protection.

5 · Fuel Surcharge Optimization — $80-200K/yr

Most brokers leak 1–3% of margin on FSC misalignment between what they pay carriers and bill shippers. The platform reconciles both sides automatically.

6 · Lane Profitability Ranking — strategic upside

Identifies the top 20% of profitable lanes and points sales at lookalike shippers. The difference between chasing volume and chasing margin.

7 · Claims Automation & Working Capital — $20-50K + cash flow

Faster, documented claims with auto-attached POD/BOL. Reduces dispute time, recovers more legitimate claims, and improves working capital by 8–14 days on the impacted invoices.

THE STACK EFFECT

No single bonus lever justifies a platform on its own. But layered together — on top of the five primary revenue engines — they add another **$215K-$480K/yr** of revenue and avoided cost. That's the difference between a "nice tool" and operating leverage.

THE NUMBERS

The Numbers That Tell the Story

Five primary levers. Seven bonus mechanics. One unified platform across three operating companies.

NET NEW REVENUE CREATED
$2,015,000

MARGIN RECOVERY (12 MO)
$310,000

BCAT GROSS MARGIN
15.2% → 16.8%

IVAN TRUE PROFIT MARGIN
5.2% → 7.5%

SPOT QUOTE WIN RATE LIFT
20% → 26%

EMAIL OPEN / REPLY RATE
42.3% / 8.4%

ON-TIME DELIVERY
91.4% → 96.2%

COMBINED SALES PIPELINE
$3,780,000

BLENDED MARKETING ROAS
3.1x

AGENTS RUNNING 24/7
6

CONSERVATIVE TOTAL ECONOMIC IMPACT

$2.32M in combined net new revenue ($2.0M) + margin recovery ($310K) within the first 12 operating months. Conservative scenario across primary levers alone produces ~$1.2M.

LET'S BUILD YOURS

READY TO STOP LEAKING REVENUE?

Your Business Has the Same Five Leaks. The Question Is What You Do About Them.

Every dollar of revenue in this study came from a decision that was only possible because the right data was visible at the right time. If you can't answer these questions in 60 seconds, you have leaks:

→ What's my win rate on quotes — and how fast did I respond to each one?

→ Which trucks made money this week, and which ran at a loss?

→ Which existing customers gave 30% of their lanes to a competitor last month?

→ What's my OTD by lane, and which shippers will pay a premium for it?

Ryne Bandolik

→ Click here to book a call

ryne@bcatcorp.com · 224-715-1381

$2.0M

In net new revenue created across the group.

$310K

In margin recovery — same team, more output.

$3.78M

Combined active sales pipeline across all units.

> ❝ *The $2M wasn't hiding. It was just invisible. The Command Center made it visible — and the revenue followed.*
